

The Airmaster bird net prevents birds and small animals from entering the air handling unit through the duct system and it prevents leaves from clogging the filters in the air handling unit. The net comes in 4 sizes to fit into ducts with diameters of Ø160, Ø200, Ø250 and Ø315. The size of the mesh in the bird net is 10 x 10 mm.

The bird net should be mounted and secured in the duct system before mounting the facade grille.

Product data

Ød1 <i>nom</i>	A <i>[mm]</i>	B <i>[mm]</i>	Weight <i>[kg]</i>
160	43	64	0,22
200	43	64	0,28
250	62	83	0,42
315	66	87	0,55

Material and finish

- Galvanized steel
- Standard finish: untreated

Maintenance

The bird net must be inspected regularly, and any debris such as leaves or insects should be removed to ensure unobstructed airflow
